

Developing life-sustaining detours.

Preserving the vascular access site demands regular surgical revision because each case presents a unique challenge. That's why Gore's comprehensive product line covers full graft, jump graft, suture, and patch revision with a variety of configurations. As the experts in ePTFE technology, we are constantly investigating ways to improve outcomes in vascular access. And we recently introduced two products* for the indication. At Gore, we're working to help you maintain the vital intersections in your patients.

- *INTERING vascular graft
- *GORE-TEX® ACUSEAL cardiovascular patch
- GORE-TEX® STRETCH vascular graft
- GORE-TEX® vascular graft
- GORE-TEX® suture
