Infra renal by Choice.

Suprarenal Fixation Devices
- Renal Impairment Risk
- Additional Procedural Steps
- “Top Cap” Deployment Issues
- Suprarenal Angulation Restrictions
- Open Conversion Issues

GORE® EXCLUDER®
AAA Endoprosthesis
STAY PUT, STAY PATENT,
STAY INFRArenal.

Outstanding migration and patency data with
0.80% migration and 1.98% renal impairment.

A PubMed® search of all EVAR literature since 2001 generated 7 peer-reviewed publications\(^1\) that report on kidney function or renal artery complications following EVAR and met basic criteria for inclusion in this literature review. The inclusion criteria for these publications was a minimum of 40 patients and follow-up of greater than one year.

This literature review is intended to reflect real-world experience as presented by physicians in the literature, and is not intended as a substitute or comparison to clinical trial data.
