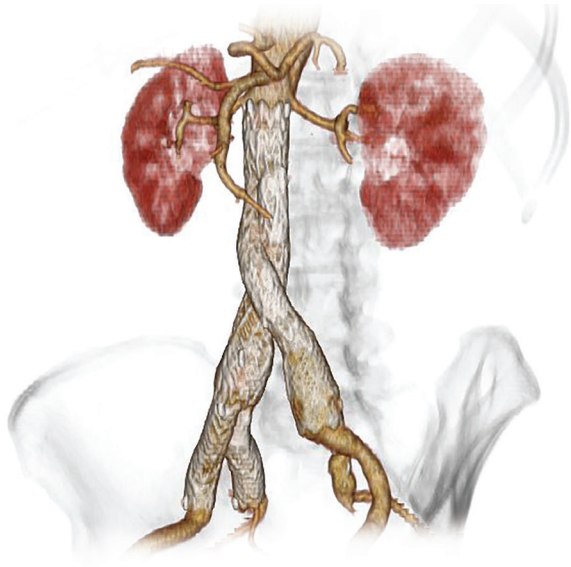
GORE® EXCLUDER®
Iliac Branch Endoprosthesis

THE SOLUTION PHYSICIANS TRUST AND PATIENTS COUNT ON



Long-term clinical trial data

U.S. IDE Clinical Trial 5-year data
63 patients* from primary enrollment

100%
Patency — External iliac artery

95.1%
Patency — Internal iliac artery

0%
Buttock claudication†

0%
New onset erectile dysfunction

ZERO
Type I/III endoleaks
Migrations

98.3%
Freedom from CIAA† enlargement (> 5 mm)

95.2%
Freedom from IBE-related reintervention

Core Lab reported assessment for patency, endoleak, migration and CIAA enlargement. Denominator is number of subjects evaluated for primary effectiveness endpoint result with an evaluable result.

* Sixty-three subjects with device implanted in initial cohort. Thirty-six patients have completed 5-year follow-up.
† On the side treated with the IBE.

Together, improving life

THE SVS CLINICAL PRACTICE GUIDELINES FOR ABDOMINAL AORTIC ANEURYSM[1] (AAA) INCLUDE RECOMMENDATIONS PERTAINING TO HYPOGASTRIC PRESERVATION DURING EVAR TREATMENT.

These recommendations include:

Preservation of flow to at least one internal iliac artery

1 (Strong) | **A** (High)

Level of recommendation | Quality of evidence

Using a Food and Drug Administration (FDA) approved branch endograft in anatomically suitable patients to maintain perfusion to at least one internal iliac artery.

1 (Strong) | **A** (High)

Level of recommendation | Quality of evidence

PRESERVE FLOW. ADVANCE CARE.

- **Preservation matters:** Recommended treatment[1,2] to sustain quality of life
- **Advances repair:** All-In-One System with proven outcomes
- **Performs as promised:** High patency[3], conformability and durability
- **Complete confidence:** More than 20 years of aortic device experience
