Durable outcomes.
Proven performance.

GORE® EXCLUDER®
AAA Endoprosthesis

GORE® EXCLUDER® Iliac
Branch Endoprosthesis
GORE® EXCLUDER® AAA Endoprosthesis

The most-studied* EVAR stent graft designed for durable outcomes.

The trusted performance of the GORE® EXCLUDER® Device is paired with the intuitive GORE® C3® Delivery System to provide optimal infrarenal seal and reliable results, even in more challenging anatomies.

Proven Performance.
Results from the Global Registry for Endovascular Aortic Treatment (GREAT)

3,274 Patients through 5 years of follow-up
94.7% Freedom from device-related reintervention
0.0% Migration
1.6% Type I endoleak
0.2% Type III endoleak
0.7% Limb occlusion

GORE® C3® Delivery System

- Repositionable to obtain optimal seal
- Unique ability to reconstrain the proximal end and reposition for ideal placement
- More opportunities to maximize infrarenal seal
U.S. IDE Clinical Trial now has 3-year follow-up data for all patients from primary enrollment (n = 63).

**3-year data**

- **100%** Patency — External iliac artery
- **95.1%** Patency — Internal iliac artery
- **93.7%** Freedom from reintervention
- **0%** Buttock claudication
- **0%** New onset erectile dysfunction
- **98.3%** Freedom from CIAA enlargement (> 5 mm)

**We designed this all-in-one system exclusively for use in the iliac arteries. It is the only FDA-approved, off-the-shelf iliac branch solution.**

**Preservation matters:**
Recommended treatment\(^1,2\) to sustain quality of life

**Performs as promised:**
High patency\(^3\), conformability, and durability

- Pre-cannulated internal iliac gate and bi-femoral delivery for ease-of-use
- Low profile (16 Fr) delivery for enhanced vessel access and trackability
- Two-staged repositionable deployment for precise placement of the iliac component

**U.S. IDE Clinical Trial now has 3-year follow-up data for all patients from primary enrollment (n = 63).**

**3-year data**

- **100%** Patency — External iliac artery
- **95.1%** Patency — Internal iliac artery
- **93.7%** Freedom from reintervention
- **0%** Buttock claudication
- **0%** New onset erectile dysfunction
- **98.3%** Freedom from CIAA enlargement (> 5 mm)

**Procedure time**
- **152 minutes**

**Contrast used**
- **114 ml**

**Fluoro time**
- **40 minutes**

**Technical success\(^4\)**
- **95.2%**
The GORE® EXCLUDER® Device family has evolved based on what we have learned from over 20 years of experience in EVAR.

Worldwide experience

- More than 350,000 patients treated with GORE® EXCLUDER® AAA Endoprosthesis
- More than 15,000 GORE® EXCLUDER® Iliac Branch Endoprosthesis devices implanted

Durability

1. Sutureless construction
   - Expanded PTFE graft technology on luminal and abluminal surfaces

2. Advanced sinusoidal stent design
   - Enhances flexibility and long-term conformability

3. Proprietary ePTFE film layers
   - Low permeability with abrasion-resistant properties
   - Conformability in tortuous anatomies

4. Sealing cuff
   - Engineered to provide security against endoleaks

5. Active infrarenal fixation
   - Anchors for active fixation are engineered to provide migration resistance
Physician collaboration and unwavering commitment.

When we join with our partners in the medical community, we work together to advance patient care. With the only FDA-approved iliac branch solution, and durable outcomes with more than 20 years of EVAR experience, the GORE® EXCLUDER® Device family offers solutions physicians trust and patients count on.

The GORE® EXCLUDER® Iliac Branch Endoprosthesis is to be used in conjunction with the GORE® EXCLUDER® AAA Endoprosthesis and is not intended to be used on its own.

* Based on company-sponsored trials and registries shown on clinicaltrials.gov for currently available stent grafts.

† GREAT. n=3,274. To calculate the overall event rates from procedure through end of study period, all subjects who could have had events, regardless of length of follow-up, were included. For outcome data, GREAT only collects site reported serious adverse events.

‡ One peri-procedural migration reported. Zero migrations reported during follow-up through 5 years.

§ Defined as successful implantation with lack of endoleaks.

¶ Based on the number of Trunk-Ipsilateral Legs distributed.

‖ Based on the number of Iliac Branch Components distributed.
