SURPASS* is an observational, prospective, single-arm post-market registry. 20 European sites in seven countries are included.

ZERO

- Type Ia and Type III endoleaks
- Fractures
- Device compressions
- Ruptures

100% Successful deployment
98.4% With no device-related issues
97.2% Freedom from serious access complications

Aortic pathology treated:

- Treatment of Type B dissection (complicated / uncomplicated)
- Descending thoracic aortic aneurysms (including ruptures)
- Penetrating aortic ulcers
- Traumatic aortic transection
- Intramural hematoma
- Pseudoaneurysm

98.4%
Reported that proximal wall apposition was acceptable at procedural completion

1.38
Devices per procedure

92.9%
No rapid pacing used

* Rates are based on physician experience as reported for 127 subjects in Europe within a 30 day follow-up period. European-Post Approval Registry: Observational Registry Characterizing the Performance and Feature Use of the GORE® TAG® Conformable Thoracic Stent Graft Featuring ACTIVE CONTROL System. (data on file 2017; W.L. Gore & Associates, Inc; Flagstaff, AZ.)

INDICATIONS FOR USE IN THE U.S.: The GORE® TAG® Thoracic Stent Graft is intended for endovascular repair of all lesions of the descending thoracic aorta, including: Isolated lesions in patients who have appropriate anatomy, including: adequate iliac / femoral access, aortic inner diameter in the range of 16–42 mm, ≥ 20 mm non-aneurysmal aorta proximal and distal to the lesion; Type B dissections in patients who have appropriate anatomy, including: adequate iliac / femoral access, ≥ 20 mm landing zone proximal to the primary entry tear; proximal extent of the landing zone must not be dissected, diameter at proximal extent of proximal landing zone in the range of 16–42 mm. CONTRAINDICATIONS: Patients with known sensitivities or allergies to the device materials; patients who have a condition that threatens to infect the graft. Refer to Instructions for Use at goremedical.com for a complete description of all warnings, precautions, and adverse events. INDICATIONS FOR USE UNDER CE MARK: The GORE® TAG® Thoracic Stent Graft is indicated for endovascular repair of the descending thoracic aorta. CONTRAINDICATIONS: Patients with known sensitivities or allergies to the device materials; patients with a systemic infection who may be at increased risk of endovascular graft infection. Refer to Instructions for Use at goremedical.com for a complete description of all warnings, precautions, and adverse events.

Products listed may not be available in all markets.
